#### **Required Textbook:**

Myers, D. (2014). *Myers' Psychology for AP*. (2<sup>nd</sup> ed.). New York: BFW/Worth Publishers. ISBN: 978-1-4641-1307-9

## **Course Description**

This course is an introduction to various areas of psychology, including scientific investigation, motivation, personality, intelligence, behavioral deviation, perception, learning and human development. It offers a basis for further study in related areas.

#### **Course Objectives:**

- 1. To assist students with identifying any misconceptions and/or lack of background knowledge, thus allowing them to develop a solid foundation upon which to construct future learning
- 2. To instill an understanding of ethical behavior as it applies to the field with applications to ethical living in our modern world
- 3. To help students develop an appreciation and understanding of the field of psychology and its application to various fields of study
- 4. To help students understand the history of the development of the field and future directions
- 5. To assist students with learning to become critical thinkers
- 6. To develop students skills of avoiding one's perceptions, thus not impeding critical thinking and allowing deeper levels of learning
- 7. To help students comprehend multiple perspectives on human behavior and how each perspective compliments each other
- 8. To assist students with developing an increased awareness of self and others

## **Teaching Format:**

The class will be formatted as a discussion and active learning style class. You will be asked to read relevant chapters from your textbook and come prepared to participate in class discussion and group activities.

## **Course Evaluation Criteria:**

#### **Class Participation:**

The smooth functioning on the class and your learning depend on promptness and the ability to take part in discussions. Class participation includes attending class, contributing to class discussions or activities and reading assigned sections

Homework Assignments:

Throughout the semester you will be asked to write essays answering a question related to psychology (see topics and due dates on last page). The essays should be 1 to 2 pages in length, typed, double spaced, using correct grammar and spelling, and should address the question fully, using detailed examples and explanations. Grading is as follows:

√+ (100):	Addressed the question fully, no grammar mistakes, not late
√ (85):	Either did not address question fully, grammar mistakes, or 1 class late
√- (65):	Either 2 classes late, did not address the question and grammar mistakes
0:	3 or more classes late

#### Chapter Exams:

There will be 14 chapter assessments in total, all weighted equally. The chapter assessments will cover chapter readings and material covered in class.

#### End of Chapter Questions

There will be end of chapter multiple choice questions for every module we cover. These questions will be collected the day following the completion of the module.

#### Student Presentation/Research Paper:

Each student will be responsible for two research papers and one in class presentation. See accompanying handout.

#### **Debates**

Each student will be responsible for one in-class team debate. See accompanying handout.

#### **Final Grades:**

In summary, grades will be based on the following criterion:

Participation:	10%
End of Chapter Questions:	10%
Homework Assignments:	15%
Research Papers/Debate/ Presentation:	25%
Chapter Exams	40%
Total:	100%

#### **Tentative Course Schedule** Readings should have been read before the class listed

Assignment 14

# <u>Homework Assignments</u> Assignments are due on the day listed. Please see my policy on grading late assignments

	Торіс
1	How do you think psychology might change as a result of more people from non- western countries (any country not in Europe or America) contributing their ideas to the field? What possible problems and benefits do you foresee?
2	What is imagination? How would you go about defining the term? What's the plus side of having it? Downside?
3	Think of an example in which your parents used operant conditioning to get you to do something or not to do something when you were a child. Did the conditioning work? Why or Why not? What kind of reinforcement schedule did they plan on using, which reinforcement schedule did they actually use?
4	The brain is a very complex organ. If you were a god and were designing humans, how would you design the brain? Would you have separate sections for different functions, or one undivided brain that could do everything?
5	<ul> <li>Write a letter to your parents.</li> <li><u>The letter to your parents should contain the following information:</u> 1) Describe your general feelings about your present life and values and try to assess your parents' influence on you. 2) Describe three strengths of your parents. 3) Describe a weakness of your parents or some characteristics of your parents that you would have like to have changed. 4) Choose one or two areas of development – intellectual, moral, personality, social – in which your parents had the most influence and explain how or why. 5) Thank your parents for something special. (You can choose whether to show your parents the letter or not)</li> </ul>
6	Freud is sometimes described as the father of psychology, but his critics do not agree. Do you think that Freud's ideas are relevant today, or are they outdated, or irrelevant for the modern world? Be sure to support your argument with specifics.
7	In your opinion should the term addiction be applied to conditions such as gambling, eating, the internet?
8	If you had to give up one sense, which one would it be and why?
9	How would you draw the line between sending disturbed criminals to prison or to mental hospitals? Would the person's history (for example – being abused as a child) influence your decision?
10	How do you feel about giving people who have been diagnosed with a mental illness (bi-polar disorder, schizophrenia, depression, etc.) the freedom to choose not to take medication? Should we force people to take medication for their own safety and others, or should we allow them the right to decide?
11	Do you think you are more influenced by internal hunger cues or external hunger cues? Give a few examples that support this hypothesis

12	How could you use the principles of social psychology to persuade your parents to buy you a new car?
13	Proponents of multiple intelligences assume that the word smarts and number smarts measured by the traditional intelligence tests are not the only way to measure intelligence. Different people have different gifts. Do you agree with this concept? What kinds of intelligences do you have?
14	Suggestions for improving the class or explaining what worked well. Be honest, but constructive (my feelings are important to me). There will be no negative penalty for speaking your mind because my goal is to always refine the formula to create a better learning environment.
